"SZABAD NEP" 500 MILLION DOLLARS PER YEAR FOR ESPIONAGE

7/28/53  
Personal

Aug 17, 1953 In the US, subversive activity directed against the USSR and the people's democracies is performed by a network of government agencies, all of which are centralized in CIA.

The people's democracies have been informed of CIA and its Chief, Allen Dulles, for a long time. Previous intelligence has now been confirmed by two bourgeois periodicals, the American Time and the Swiss Die Weltwoche.

The 3 August issue of Time describes the powerful espionage system under Mr. Dulles' jurisdiction. Its personnel has been estimated at 8,000 - 30,000, it occupies 30 buildings in Washington, and its annual budget is conservatively estimated at 500 million dollars.

According to Time, CIA has been engaged not only in espionage but also in the support of resistance movements, and perhaps also in sabotage; and its agents are equipped with modern plastic explosives.

As reported by Die Weltwoche, only a very small number of people, varying between five and fifteen, is initiated in the moves of CIA aimed at infiltrating into the highest military and political commands of the "other side."

A great deal of the methods of CIA is revealed by the fact alone that its Chief is the brother of the American Secretary of State. Time represents Allen Dulles as predestined for the job. During the first world war he was a spy in Switzerland. Later, he was associated with his brother's law firm, but during the second world war he returned to his profession and headed the largest and most effective espionage agency, located in Switzerland.

Die Weltwoche reveals that "the darkest actions, which appear dubious in the light of the rules of international morality, are ordered by Allen Dulles with a clear conscience."

The fact that the State Department and CIA are headed by two brothers is, of course, a coincidence. However, it is certain that the State Department is brother to CIA.
